

## Pset#1: Solving systems of equations by substitution

Precalculus

Spring Semester 2022

Herbert H. Lehman High School

February 1, 2022

**Be sure to:** Complete all work in your notebook. Upload a photo to Google Classroom to submit. Show all work!

**For exercises (1-2), determine whether each ordered pair is a solution to the system of equations.**

1. 
$$\begin{cases} 4x - y = 1 \\ 6x + y = -6 \end{cases}$$

A.  $(0, -3)$

B.  $(-1, -5)$

C.  $(-\frac{3}{2}, 3)$

D.  $(-\frac{1}{2}, -3)$

2. 
$$\begin{cases} 4x^2 + y = 3 \\ -x - y = 11 \end{cases}$$

A.  $(2, -13)$

B.  $(-2, -9)$

C.  $(-\frac{3}{2}, 6)$

D.  $(-\frac{7}{4}, -\frac{37}{4})$

3. Solve each system of equations using substitution. Be sure to check your results.

a. 
$$\begin{cases} x - y = 0 \\ 5x - 3y = 10 \end{cases}$$

c. 
$$\begin{cases} 1.5x + 0.8y = 2.3 \\ 0.3x - 0.2y = 0.1 \end{cases}$$

b. 
$$\begin{cases} 2x - y + 1 = 0 \\ 4x + y - 5 = 0 \end{cases}$$

d. 
$$\begin{cases} \frac{1}{2}x + \frac{3}{4}y = 10 \\ \frac{3}{4}x - y = 4 \end{cases}$$

4. A small software company invests \$16,000 to build an app that solves systems of equations for high school students. The app will sell for \$19.95 and is produced for \$9.45.

a. Write the cost and revenue functions for  $x$  units produced and sold.

b. How many units need to be sold before the company can break even?
